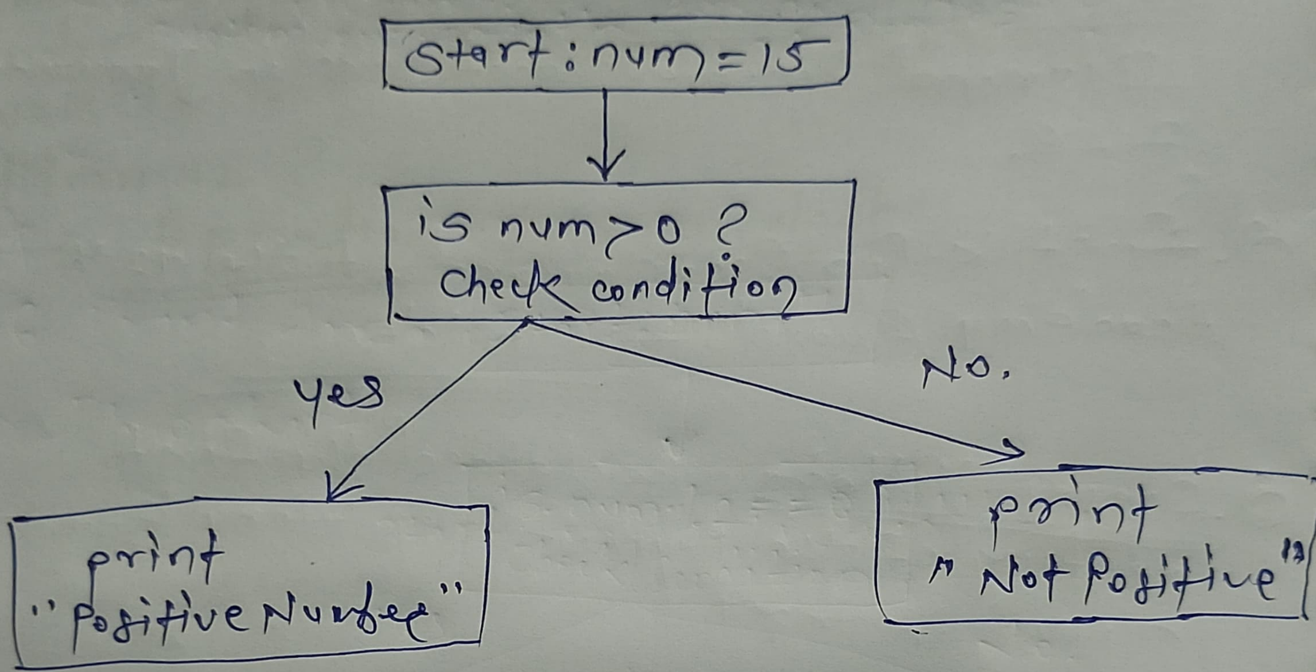
Assignment - 1

Q.1 Check Positive Number.

→ flow chart.

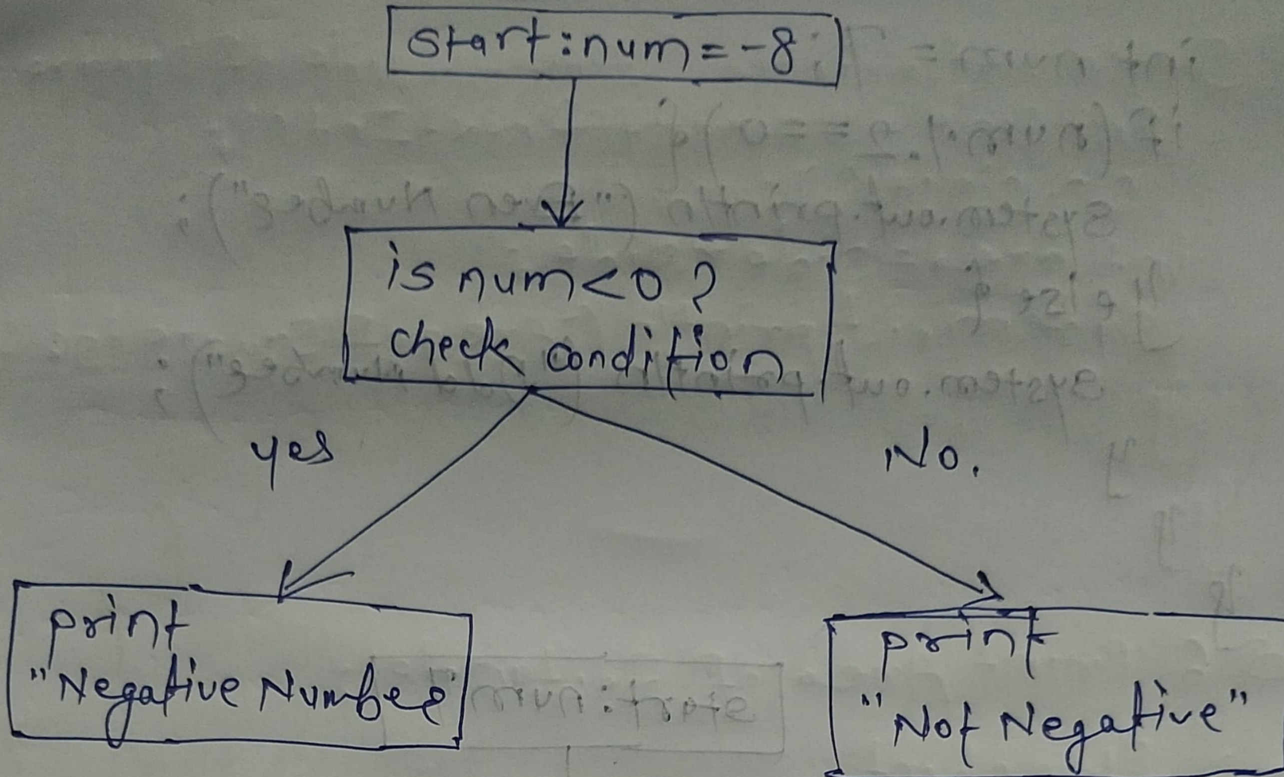


Code:

```
public class PositiveNumber{
    public static void main(String args[]){
        int num=15;
        if(num>0){
            system.out.println("Positive Number");
        }else{
            System.out.println("Not Positive");
        }
    }
}
```

Q.2 check Negative number.

→ flowchart



code:

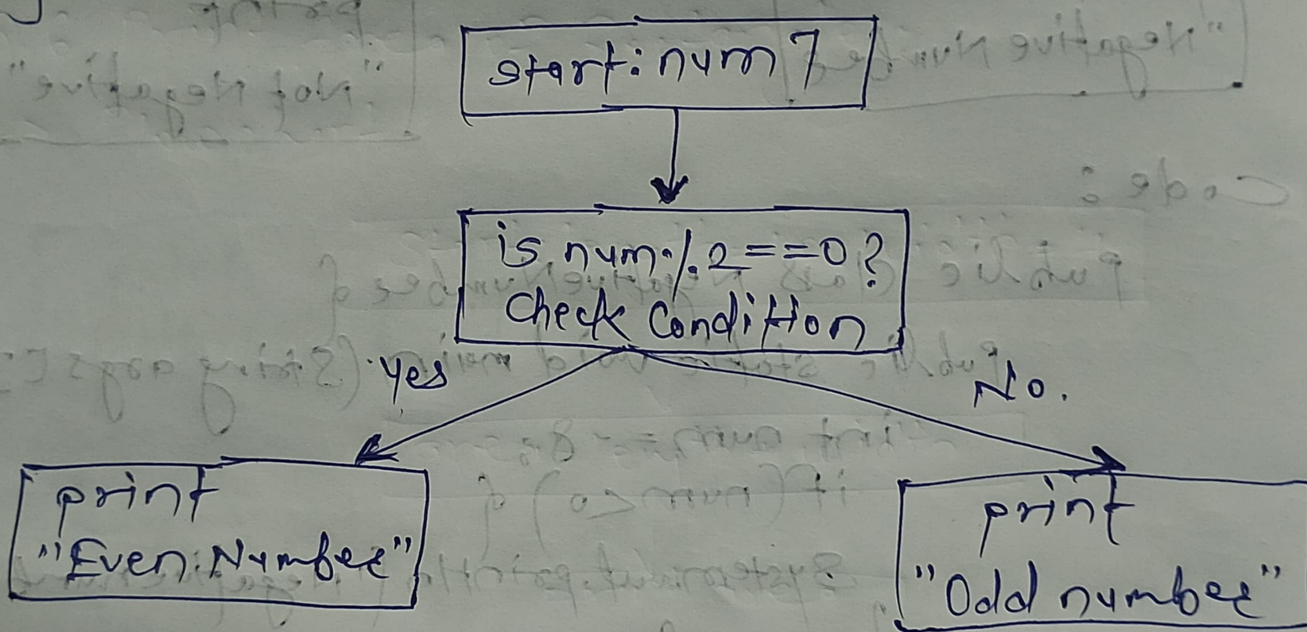
```
public class NegativeNumber{
    public static void main(String args[]){
        int num=-8;
        if(num<0){
        System.out.println("Negative number");
        }else{
        System.out.println("Not Negative");
        }
    }
}
```

Q.3 Check Even or Odd number.

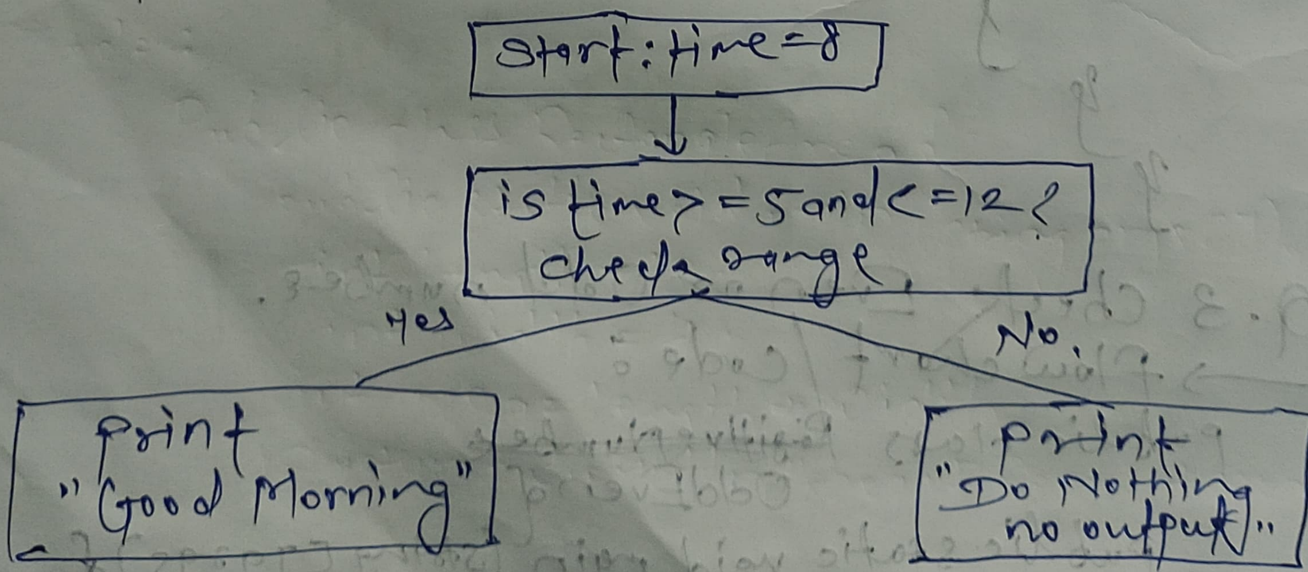
→ flow chart / code:

```
public class ~~PositiveNumber~~ OddEven{
    public static void main(String[]args){
```

```
int num = 7;
if(num%2==0){
  System.out.println("Even Number");
}else{
  system.out.println("Odd Number");
  }
 }
}
```



Q.4. Good Morning Message Based on Time.
→ flow chart

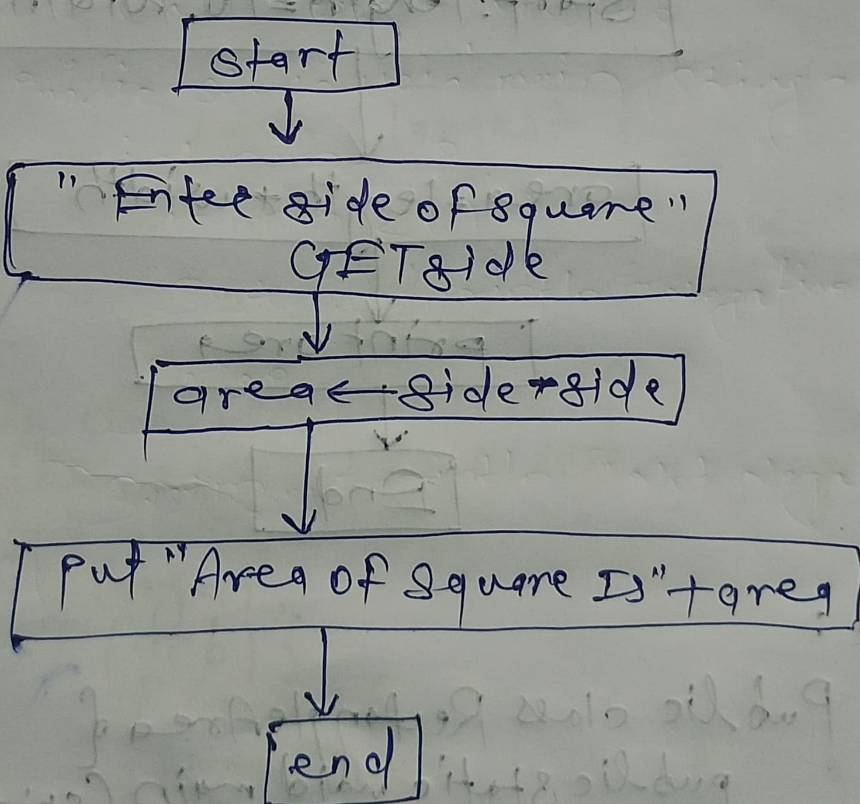


code:

```
Public class GoodMorning{
    public static void main (String args[]){
    int time=8; //24 hour format.
      if (time>=5 && time<=12){
         System.out.println ("Good Morning");
      }
    }
}
```

Q.5 Print Area of Square.

→ flow chart.



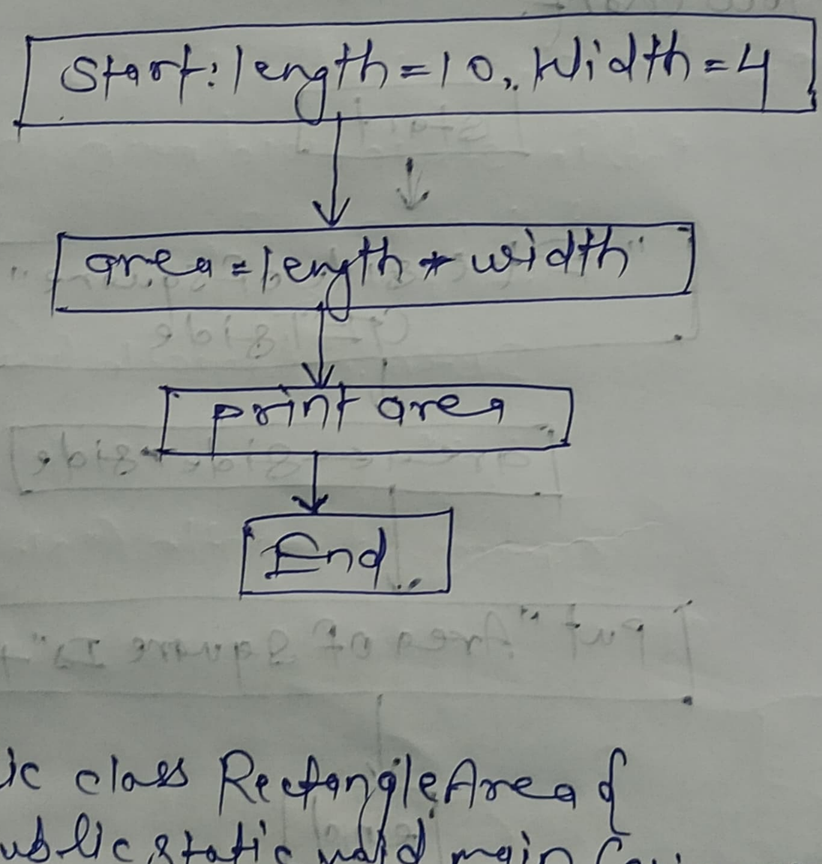
code:

```
public class AreaOfSquare{
  public static void main (String args[]){
  Scanner sc = new Scanner(System.in);
```

```
System.out.println("Enter the side of Square:");
   int side = sc.nextInt();
   sc.close();
  int area = side * side;
  System.out.println("Area of Square is: "+area);
  }
}
```

Q.6 Print Area of Rectangle :

→ flow chart

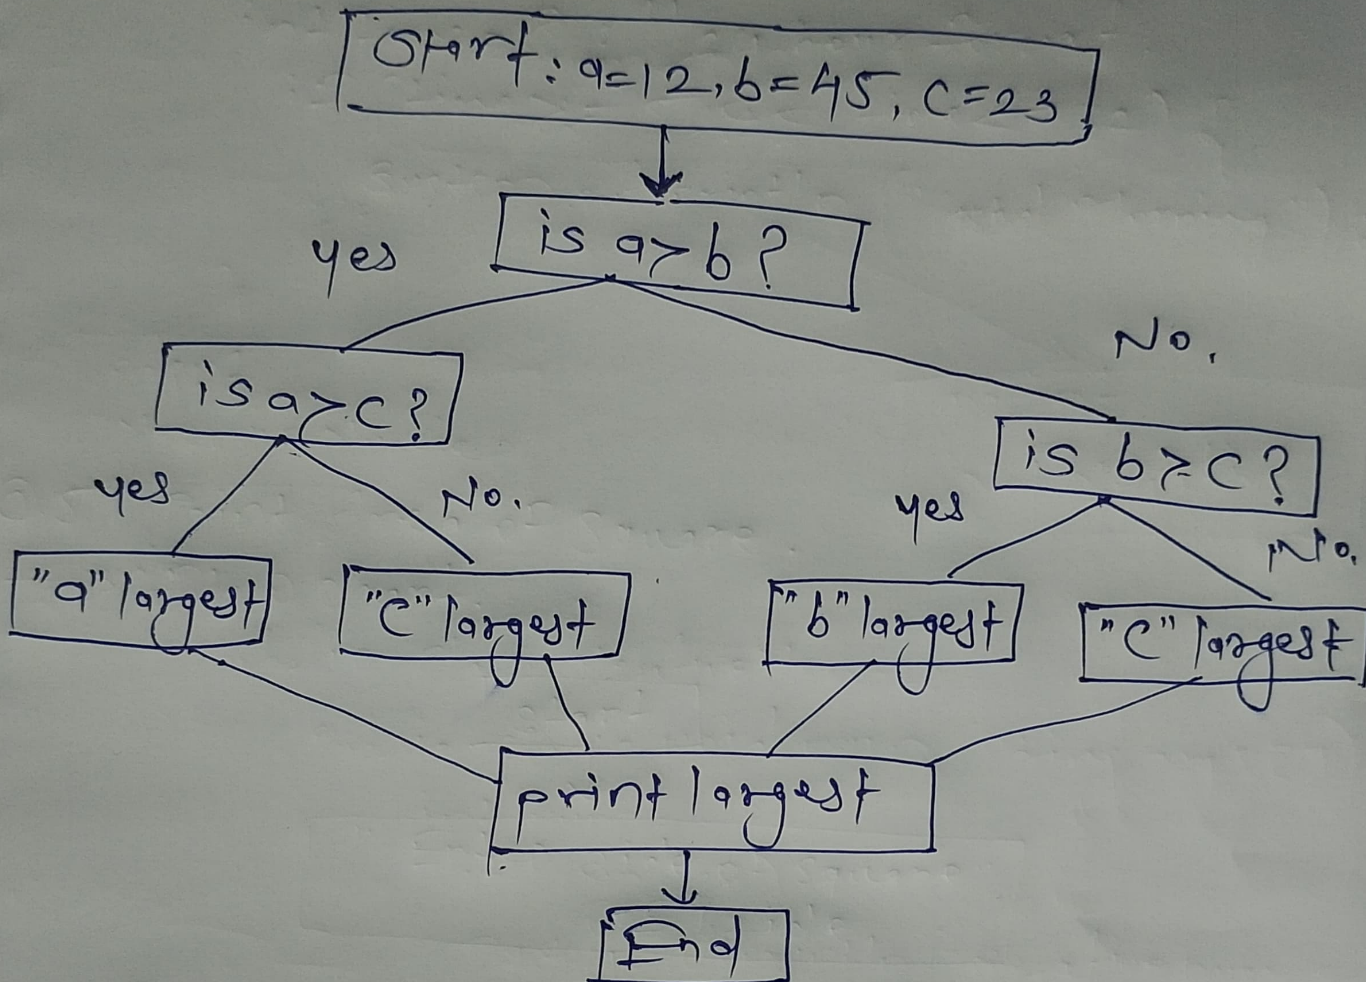


Code :

```
Public class RectangleArea {
    public static void main (String args []){
      int length = 10;
      int width = 4;
     int area = length * width;
    System.out.println("Area of Rect: "+area);
  }
}
```

Q.7 Print Largest of three Numbers.

→ flow Chart.



Code:

```
public class LargestOfThree{
  public static void main(String []args){
    int a=12, b=45, C=23;
    int largest;
    if (a>b) {
      if (a>c) {
        largest = a;
      }else{
        largest =C;
      }
    }else{
      if(b>c){
        largest=b;
      }else{
        largest=C;
      }
    }
    System.out.println("largest Number:"+ largest);
  }
}.
```
